

SINGLE USE COURIER ENVELOPE - FORMULA BAG

- 1 The envelopes are made from strong, water-resistente material
Closing of the envelope: with strong, „hot melt” adhesive.
- 2 Barcoding, sequential numbering and micro-printing at the seams.
- 3 One side of the standard type has barcode, seq. no, and writing areas. The „sender, consignee, content, delivery note no., others” box names are shown in English and Hungarian as well.
- 4 The microprinting at the seams of the envelopes increases their security . It prevents tampering by cutting the side of the envelope open and – without leaving a trace - re-welding them. This makes mechanical tampering visible.
- 5 Customized versions are also available above certain quantity.

APPLICATION, SPECIFICATIONS

- Formula bags are used by courier companies and for the movement of documents, data sheets, etc.
- Its advantages compared with the traditional envelope are the water resistente, strong, difficult-to-tear material.
- The strong hot melt adhesive, the barcode, the sequential numbering, the microprinting and the writable areas ensure the easy handling.
- Envelopes can also be customised (minimum order quantity is depending on the size) by placing logo, barcode, sequential numbering on the product. Production of the envelopes allows different sizes and colours. They can be produced with control receipts, which can be torn off; Additional carrying handle on the envelopes or pocket for documents, microprintings are as an option.
