

NT „NON TRANSFER” – SECURITY LABEL

- ❖ This is a high tack security label. When lifted an „OPEN VOID” security message appears on the label but leaves no trace on the surface. Therefore tampering can be traced at a glance.
- ❖ With this characteristic it is especially useful in those areas where seals are used really frequently or where the application surfaces are required to stay clean. In fact this seal can be used in any application where no residue is a requirement.
- ❖ These labels are cold resistant up to a certain level and thus cannot be tampered with.
- ❖ Basic colours are red, blue and green but there are seven different colours available. Supplied with white release liner in rolls.
- ❖ Non transfer labels can be customized by placing personalized markings, company logo or optional barcode on the labels.

APPLICATION

- ❖ This seal, unlike many other “VOID” residue labels can be used daily, because post treatment of the application surface, i.e. rubbing the substrate away is not in question any more with this label. This label can be used anytime and any place where residue seals are not welcomed. It is recommended for sealing different boxes, cassettes, doors (e.g. emergency exits)
- ❖ Clean the surface before using the label!
- ❖ Recommended application temperature: 20-25 °C. The adhesive reaches the full efficiency in 10 minutes.
- ❖ Not recommended on rough surfaces.
- ❖ Test the label on the surface before use under the intended application’s circumstances.
- ❖ Preserve the labels in constant temperature +15 ~ 25 °C, and avoid being exposed to high humidity and sunlight. Shelflife: 1 year under suitable storage circumstances.

Label type	Sizes (mm)	Material	Stock version	Further marking facilities
NT	Standard		√	√
Non transfer label	30 mm x 20 mm 58 mm x 20 mm 90 mm x 30 mm 110 mm x 30 mm	Strong PET polyester	Blue, red and green Every label is marked and sequential numbered	Logo, barcode and any special serial number available
